[Files]

None

[Summary]

Really geeky trivia or Google-fu

[Answer]

sudo

Walkthrough

One member of our team thought aloud, "I wonder if they mean sudo?" "What?" said another player. "You know," the original player started, "when you type 'sudo' into your command line for the first time and get the warning about it's use..." "Ohhhh, yeh..."

Example:

```
squidly1@SRU:~$ sudo vi /etc/resolv.conf
```

```
We assume you have received the usual lecture from the local System
Administrator. It usually boils down to these three things:
```

- #1) Respect the privacy of others.
- #2) Think before you type.
- #3) **With great power comes great responsibility.**

```
Password:
```

```
squidly1@SRU:~$
```
