Walkthrough

We probed the server on port 6000 and discovered that the user, "sheep," was using VIM as a shell. Next we logged in as sheep and typed in:

```
set shell=/bin/bash
```

and then:

```
shell
```

```
pwn21.ddtek.biz - PuTTY
Using username "sheep".

After getting a bash prompt we listed the directory we were in and found a file called key. Did a cat on key and found SHis4pansies in it.
